

## the *dynamic* offshore engineering company

### TIEBACK ENGINEERING

Prior Planning Prevents Poor Performance!

- Efficiency
- Risk reduction
- Minimizing rig time
- Cost effectiveness
- Attention to detail.

All of these are of primary focus to Aquaterra Energy when we assist you in the preplanning of your pre-drilled well tieback operations.

With over 40 years of in house experience in the field of tieback operations, Aquaterra Energy fully understands the variety of issues surrounding this delicate operation.

We appreciate that interfaces between drilling groups, production groups, drilling rig contractors, suppliers and others are often difficult to manage and in today's busy environment, sometimes overlooked.

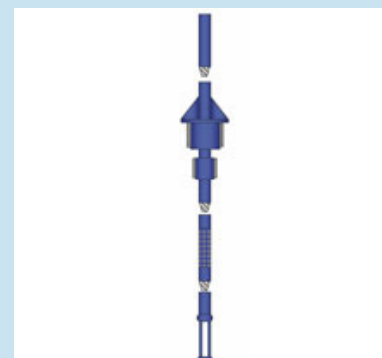

Aquaterra Energy, whilst ensuring full control remains with the client, will assist you in the compilation of an effective tieback programme to ensure that your offshore tieback operations;

- Are efficient
- Minimise risk
- Minimise rig time
- Are cost effective
- Fully address all possible eventualities and plan contingencies
- Identify all equipment requirements

Aquaterra Energy can also provide offshore support in the form of Specialist Tieback Operations Supervisors, special rental equipment to assist in the effective tieback of the various casing strings and accurate reporting to ensure your records are a valuable asset at a later date.

Why ask Aquaterra Energy to help you in planning your Tieback Operations?

Because you want an efficient service from a cost effective and experienced supplier who adds value whilst minimizing risk to your operations.
